Interior Architect transitioning to Data Analytics

bartlomiej.milosz@gmail.com | +48 663 258 022 | Warsaw, Poland
LinkedIn | GitHub

Summary

Results-driven Interior Architect with 4+ years of client consulting experience, transitioning into data analytics. Proven track record of transforming complex client requirements into actionable solutions through analytical thinking and data-driven decision making. Currently developing technical skills in Python, Excel, and data analysis while leveraging strong business acumen and problem-solving abilities. Seeking to apply analytical mindset and consulting background to drive business insights through data.

Key Strengths: Business consulting • Data analysis • Client relationship management • Project coordination • Analytical problem-solving

Technical Skills

Data Analysis & Programming

- **Python** - Data analysis, algorithms, data structures
- **Excel** - Advanced functions, data modeling, business analysis
- **SQL** - Database queries and data manipulation (learning)
- **Maven Analytics** - Currently pursuing certification

Development Experience

- **Java** - Spring Boot, Spring JPA, RESTful APIs
- **JavaScript/TypeScript** - Node.js, Express.js, basic web development
- **Database** - PostgreSQL, MongoDB basics
- **Tools** - Git, Docker basics, Maven

Business & Design

- **Microsoft Office** - Advanced Excel, PowerPoint, Word
- **Adobe Creative Suite** - Figma, design tools
- **Project Management** - Timeline coordination, client communication
- **Research & Analysis** - Market research, requirement gathering

Professional Experience

Architect & Project Manager | QKwadrat, Warsaw

June 2024 - Present

- **Business Analysis:** Analyze client requirements and translate them into actionable project deliverables, managing budgets and timelines for optimal ROI
- **Data-Driven Decision Making:** Utilize project metrics and client feedback data to optimize design processes and improve project outcomes
- **Strategic Planning:** Co-develop business strategies for emerging design studio, including market analysis and growth projections
- **Client Consulting:** Lead client consultations, gathering requirements and presenting data-backed recommendations for design solutions

Lead Architect | L'AB architekci, Warsaw

January 2022 - August 2023 (1 year 7 months)

- **Project Leadership:** Managed end-to-end architectural projects with budgets up to €500K, consistently delivering on time and within budget
- **Business Intelligence:** Analyzed project performance metrics, cost optimization, and timeline efficiency to improve operational processes
- **Team Development:** Mentored junior architects and improved team productivity through data-driven workflow optimization
- **Stakeholder Management:** Negotiated with contractors and suppliers, using comparative analysis to optimize costs and project timelines

Career Transition - Self-Directed Learning

August 2023 - June 2024

Focus Areas:

- **Programming Education:** Completed comprehensive Java programming courses, built portfolio projects demonstrating technical proficiency
- **Data Analysis Foundation:** Started Maven Analytics certification, developing Excel and Python skills for business analysis
- **Portfolio Development:** Created data-focused projects combining technical skills with business problem-solving approach

Assistant Architect | Concept7Studio, Rzeszów

February 2021 - October 2021 (8 months)

- **Technical Documentation:** Created detailed architectural drawings and material specifications with precision and attention to data accuracy
- **Client Requirements Analysis:** Gathered and analyzed client needs, translating business requirements into technical specifications

- **Quality Assurance:** Ensured all deliverables met industry standards and client expectations through systematic review processes

---

Education

Computer Science | PJATK, Warsaw

October 2024 - Present

- Currently pursuing Bachelor's degree to formalize technical education and expand programming knowledge

Master of Architecture | Rzeszów University of Technology

October 2016 - July 2021

- **Specialization:** Architecture and Urban Planning
- **Key Skills Developed:** Analytical thinking, spatial problem-solving, project management, client communication

---

Projects & Achievements

Data Analysis Projects (In Development)

- **Business Performance Dashboard** - Creating Excel-based analytics dashboard for architectural project ROI analysis
- **Client Satisfaction Analysis** - Developing Python script to analyze client feedback patterns and project success metrics

Software Development Portfolio

- **Student Enrollment System** - Java Spring application with PostgreSQL database, featuring RESTful API and comprehensive testing
- **Movie Rental Management** - Node.js application with MongoDB, demonstrating full-stack development capabilities and API design

Professional Achievements

- **Successfully managed 15+ architectural projects** with combined value exceeding €2M
- **Improved team efficiency by 25%** through process optimization and better project coordination
- **Maintained 95% client satisfaction rate** through effective communication and data-driven project adjustments

---

Core Competencies

Analytical Skills

- Business requirement analysis
- Problem decomposition and solution design
- Data interpretation and insight generation
- Process optimization and efficiency improvement

Communication & Leadership

- Client consultation and relationship management
- Cross-functional team collaboration
- Presentation of complex information to stakeholders
- Mentoring and team development

Technical Aptitude

- Quick learning of new technologies and tools
- Systematic approach to problem-solving
- Attention to detail and quality assurance
- Documentation and process improvement

Languages

- **Polish** - Native
- **English** - C1 (Advanced)

Additional Information

Career Objective: Leveraging strong analytical background and business consulting experience to transition into data analytics role where I can combine technical skills with business acumen to drive data-informed decision making.

Availability: Immediate start | Open to remote and hybrid work arrangements
